

Black and white

Photojournalism I

Due _____

For this assignment you will produce 2 interesting images, converted to black and white using Photoshop's B&W adjustment layer, as instructed during class. The images must be compositionally and conceptually different. Students will capture different types of lighting and separate subjects. Remember to consider angles, the rule of thirds and cropping while shooting. Find images with a wide tonal range, ie. a lot of light and dark colors. Remember to adjust each color individually during editing using the black and white adjustment layer.

You should:

- Create a contact sheet showing **ALL** the images you shot.
 - Remember it's never a good idea to only take what you have to turn in.
 - Print and turn in the contact sheet.
- Edit your photos using the **10 Step Editing Process**
- Upload your 2 best photos to the Google Drive folder
 - name your photos: firstname_lastname_BW1.psd and firstname_lastname_BW2.psd
- Complete caption in the "File Info" field
 - Upload the psd images directly to Google Drive — NO TURN IN TEMPLATE
