

Designing with Type

General Instructions:

Using the list below, arrange each word to express its meaning. Each composition will be a 3 x 3 inch square cut out. You should vary the size, spacing, placement and/or orientation of the letters to portray the meaning of the word. You may use any software program in the lab or trace, splice, glue and/or tape your five compositions. All five word compositions will be attached to a display board for the final presentation. You are not allowed to detour away from the base font of Arial Bold. (Font selection is in the next project.) You have three days to complete this project.
